

VISTA VPSU

RANGE OF POWER SUPPLY UNITS

POWER WITH FLEXIBILITY

The Vista VPSU range encompasses 6 units with power options suited to virtually any low voltage camera application. Whether you are looking to power single or multiple cameras, covert or fixed & fully functional dome units you will find a suitable solution in this range. As you would expect from Vista, the VPSU range has been designed with quality and reliability in mind and carries with it a 5 year warranty.

The compact size of the units allows them to fit comfortably inside the Vista VCMH range of housings for external applications whilst providing a discreet solution for internal CCTV and covert applications. They are available with 12V DC and 24V AC options, power output ranges from 500mA (12V DC) to 3Amp (24V AC).

Wall/desk mounting points provide the installer with a simple and neat method to secure the units. To further facilitate ease of installation, two of the 12V DC power supplies come with a pre-fitted 2.1mm jack - the most common plug type found on fixed domes and cameras.

IDEAL FOR APPLICATIONS SUCH AS:

- All CCTV Installations
- Boxed cameras (i.e. Protos^{IV})
- Bullet cameras
- Vandal resistant cameras
- Fixed domes
- Covert cameras
- Internal fully functional domes

MAIN FEATURES:

- 12V DC & 24V AC versions
- 500mA/1000mA & 2000mA 12V DC
- 750mA/2000mA & 3000mA 24V AC
- Wall/desk mounting points
- 190mm mains cable and 180mm low voltage cable
- Excess current protection - VDC power supplies
- Temperature protection - VAC power supplies
- Strain relief on both mains and low voltage cables
- Stabilised (regulated) - VDC power supplies
- Miniature compact design: 500 & 1000V DC PSU's only 94 x 26 x 46mm
- 5 Year Warranty
